Simon Worldwide Since 1916

Simon was established by Arturo Simon in 1916. The earliest factory was located in Olot, Catalonia, Spain. In 1972, the headquarter of Simon Group was relocated to Barcelona, which is renowned as the Flower of Europe.

Simon mainly specializes in producing switches, sockets, lighting and home smart systems. Always dedicated to product innovation, Simon has developed many products with intellectual property rights and won many honors, such as Spanish Royal Outstanding Enterprise and Spain's national Product Design Award.

Through a century of development, Simon group has established production bases in countries around the world, including China, Russia, India, Brazil, Mexico, Poland etc., and a sales network that covers over 90 countries across four continents.

The Aesthetic Touch

Simon | M7 Toggle Aurea Series

M7 Toggle Aurea Series embodies the gentle flow of water and coastal serenity. Its toggle rises like a skiff, floating effortlessly on the panel—a poetic touch for daily interaction. Rounded edges and smooth curves balance stainless steel's strength with elegance, reflecting Simon's harmony of form, function, and feeling.

Bespoke Power for Elite Living

Simon | Track Socket

Simon Track Socket

Redefine your space with the Simon Track Socket, a high-capacity power solution supporting up to 8000W. Designed for aesthetic harmony, it features diverse colors and shapes to match any luxury interior. Our multi-standard modules ensure global compatibility, while the triple-layer safety design provides ultimate peace of mind. Experience the freedom of sliding, repositionable outlets crafted from premium anodized aluminum.

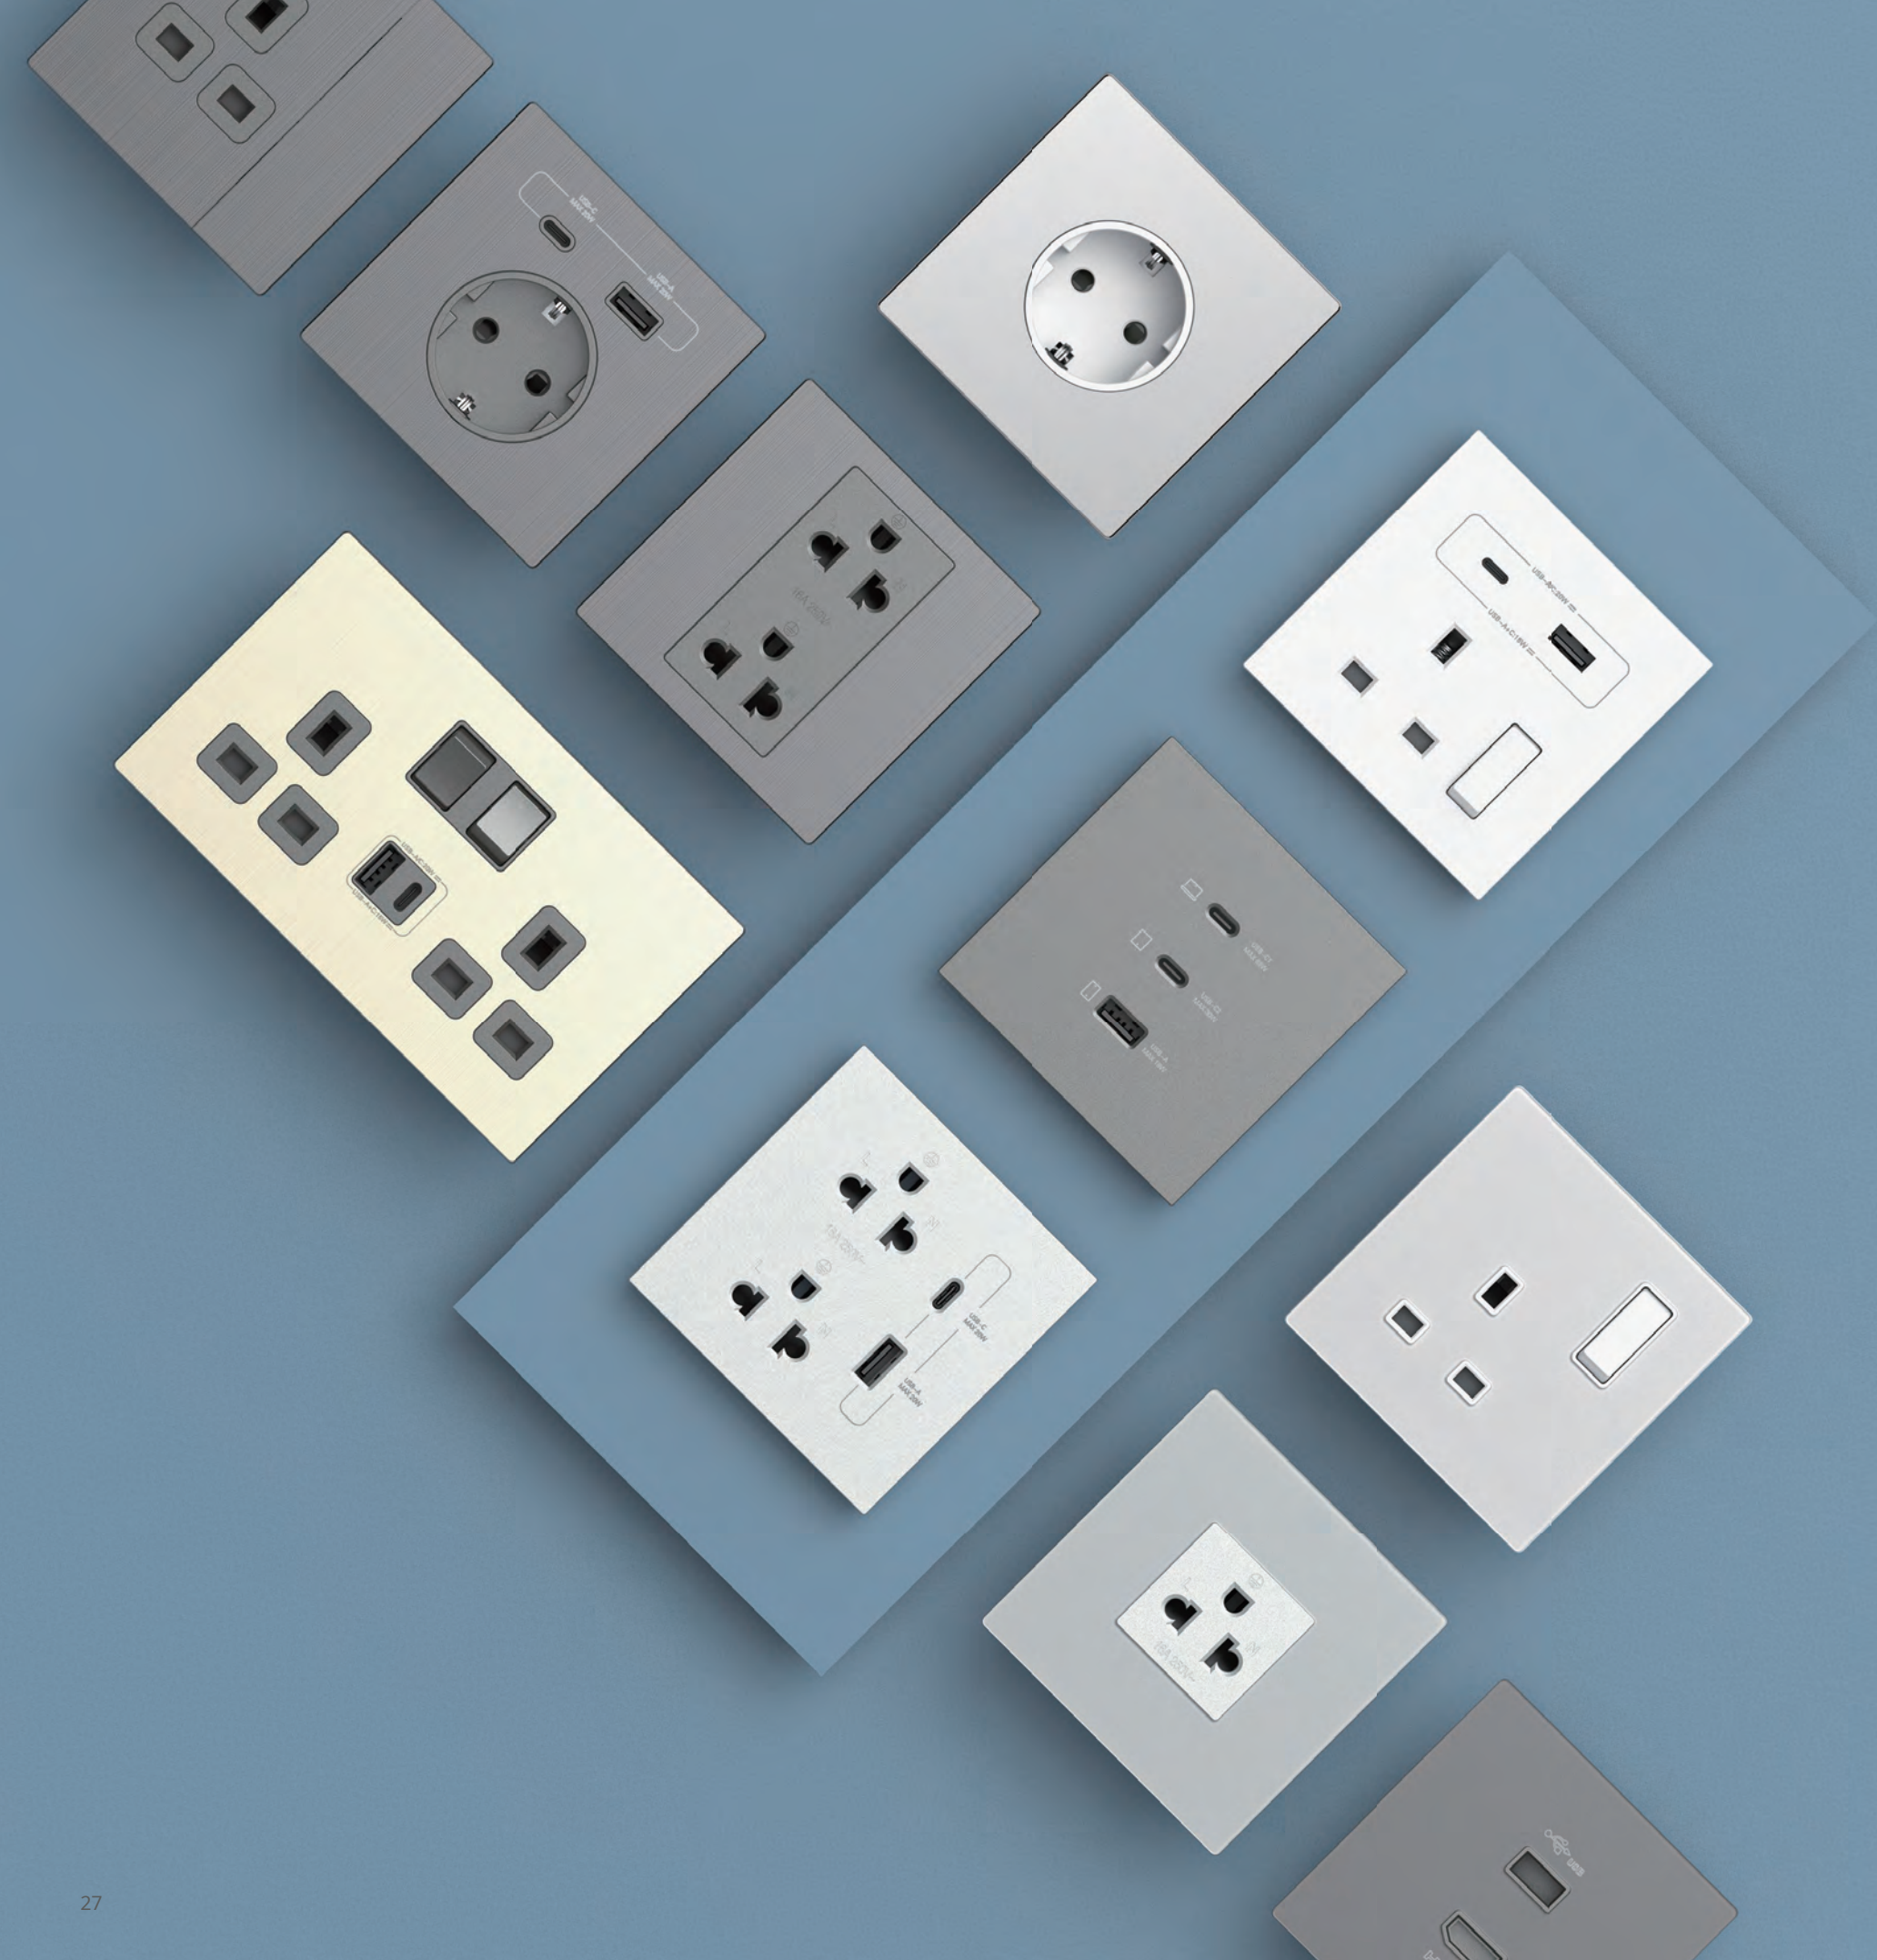

Socket

Switch & Socket Systemization

Comprehensive Range of Switches & Sockets
Unified Design, Versatile Functions
A Complete Modular Solution

Multi-Standard

A Unified Design for Global Bespoke Living

Simon ensures seamless aesthetic consistency by offering a comprehensive range of functional modules within a single design series. To meet the diverse technical requirements of luxury international residences, our collection includes power outlets tailored to BS, Schuko, EU-US, and Universal standards, allowing for effortless global integration.

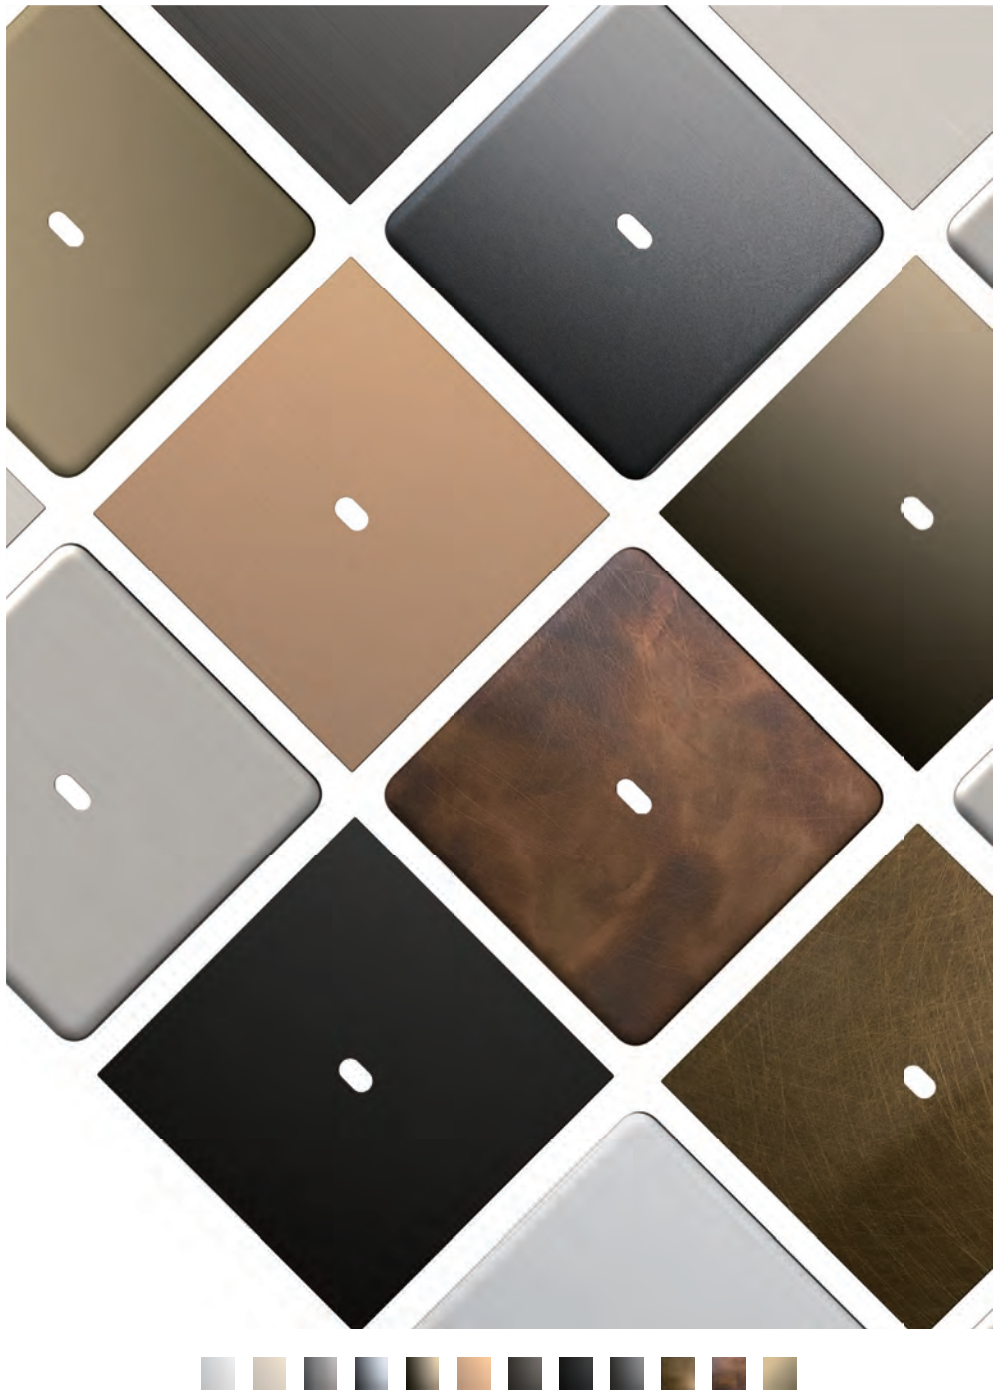

Our series is engineered for the most demanding architectural environments; whatever the residential scenario demands, we provide the corresponding functional solution. From advanced smart home interfaces and high-speed data connectivity to specialized safety components, every requirement is fulfilled under one unified design language. This allows homeowners and designers to maintain a cohesive, high-end interior across all living spaces while meeting the most rigorous localized specifications.

Surface Aesthetics: Material & Palette

Endless Color Possibilities

Tailor our surfaces to your vision. Available in a wide range of colors to perfectly match any design aesthetic.

Versatile Materials, Infinite Styles

Choose from **metal, glass, or plastic** finishes to complement any interior design. We offer tailored color solutions to meet your diverse home decor needs.

Functional Finishing

Advanced Surface Finishing Hygienic

Integrated anti-microbial technology for a safer home.

Sensory:

Exquisite skin-feel finish for ultimate comfort.

Flawless:

High-performance anti-fingerprint coating for a smudge-free look.

Lighting

Light is the Soul of a Luxury Residence

The Simon Smart home system grants you masterful control over color temperature and luminosity, transforming your living space with seamless, scene-based automation at a single touch. **Integrating Simon’s professional lighting fixtures, we provide a complete ecosystem of illumination designed to meet the diverse lighting requirements of every home scenario.** Whether through bespoke wall switches, intuitive voice commands, or our mobile interface, you can curate an infinite array of lighting atmospheres. Experience a world where intelligent management meets effortless elegance, defining the very essence of modern luxury.

Outdoor Garden Lamp

Simon Outdoor Lighting: Sculptural Artistry & Performance

Simon's courtyard lighting blends sculptural design with professional illumination. Our luminaires serve as artistic statements, enhancing gardens through sophisticated forms. While ensuring superior durability, we offer flexible customization in finishes and light distribution to curate a bespoke atmosphere for every luxury landscape.

Simon Smart Home Wired- KNX

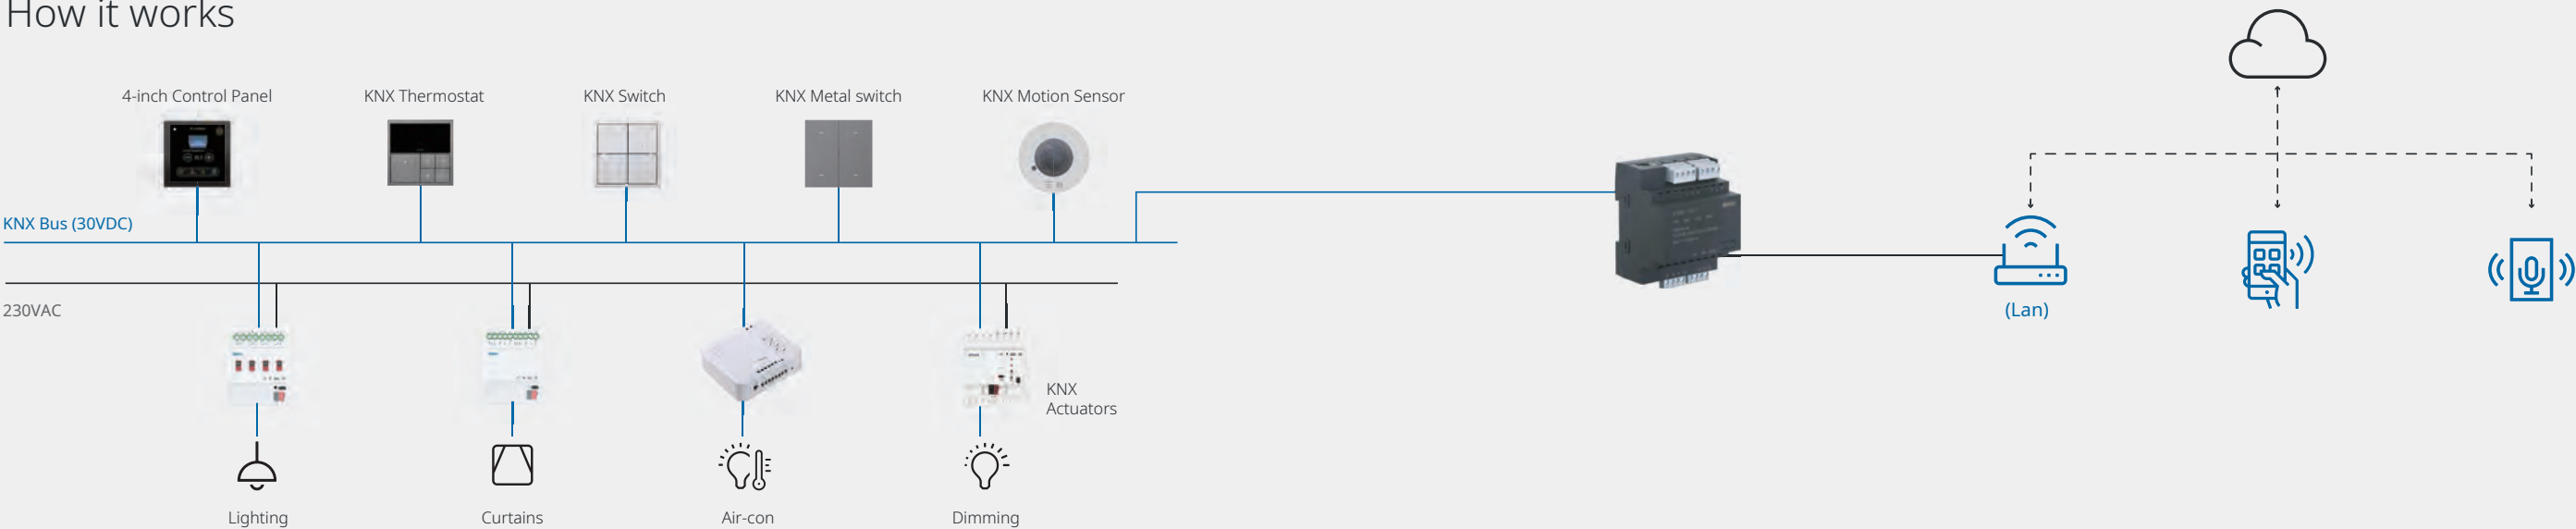

The Simon Living Experience

Artistry Powered by KNX
Elevate your residence with Simon's advanced KNX-based smart solutions. Experience a home in perfect harmony: as you enter, lighting and climate synchronize flawlessly to your presence—all backed by the industrial-grade reliability of the KNX standard.

From automated shutters that create a private sanctuary at sunset to multi-room audio that follows your rhythm, Simon unifies lighting, HVAC, and shading into one interoperable ecosystem. With Simon and KNX, sophisticated convenience is no longer just a feature—it is a way of life.

How it works

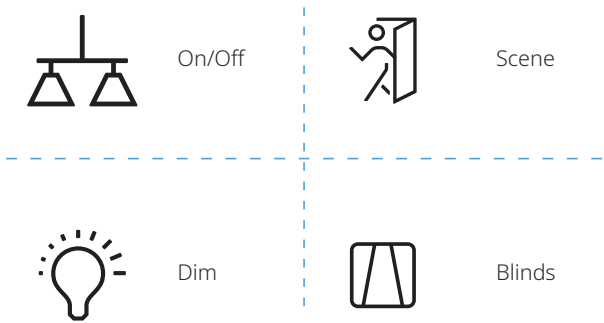

i7 KNX switch

FUNCTION

- Multi-control (On/Off, Dim, Scene, Blinds)
- Short/Long-press functionality
- 7-color options for LED indicator
- High quality PC material
- Supports multiple color options and customized icon engraving

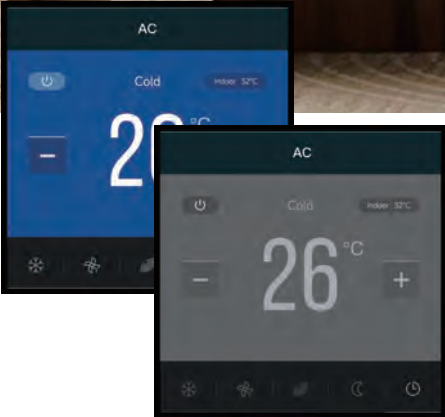

M7 KNX switch

FUNCTION

- Multi-control (On/Off, Dim, Scene, Blinds)
- Short/Long-press functionality
- Available in metal and glass finishes with 6 color options
- Features dual backlight and proximity sensing
- Supports customized icon engraving

M7 KNX Thermostat

FUNCTION

- Full Screen, Full Color
- Offering 2 KNX AC solutions
- KNX-based Fan Coil Unit A/C
- KNX-based VRF A/C

KNX Control Panel

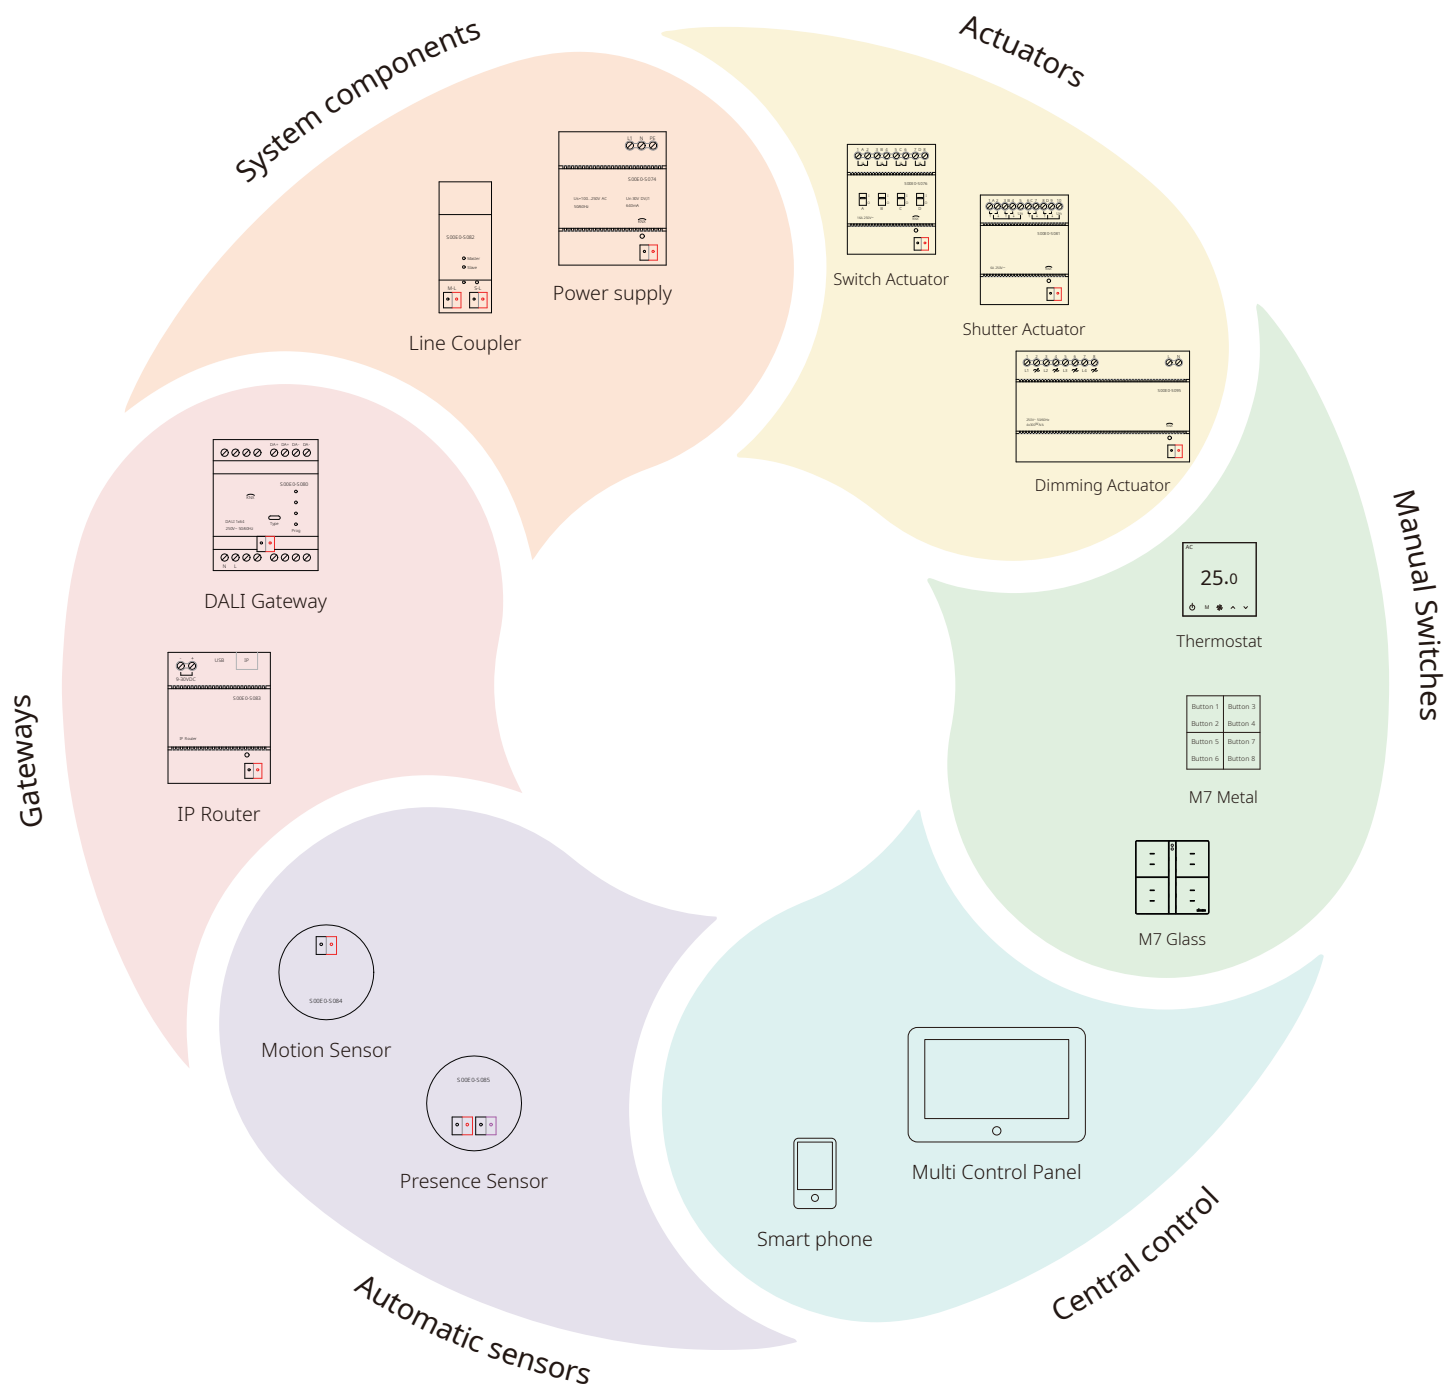

FUNCTION

- High resolution 480*480
- Supports to Ethernet
- Supports control functions including switch, dimming, blinds, color temperature, color control, A/C, etc.
- Built-in temperature sensor, proximity sensor, brightness sensor

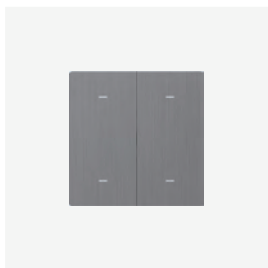

KNX by Simon

A Fully Connected System

MANUAL SWITCHES

Manual switches enable direct control via button presses or dimmers, sending commands through the KNX bus to connected devices.

AUTOMATIC SENSORS

Automatic sensors (e.g., presence, motion) convert physical measurements into electrical signals, triggering KNX telegrams for automated actions.

SYSTEM COMPONENTS

KNX system components form the bus structure (line/area couplers) and serve as programming/commissioning interfaces.

ACTUATORS

Actuators execute sensor commands, control connected loads, and provide status feedback to the KNX system.

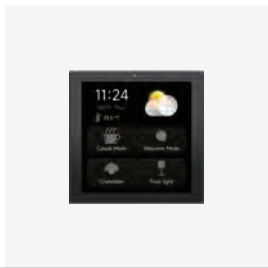

GATEWAYS

KNX gateways bridge KNX and external networks (e.g., IP), translating messages between different protocols.

CENTRAL CONTROL

Central control units provide unified management of all KNX functions, from room-level to building-wide control.

Empowering KNX App Control: The Ultimate Bridge

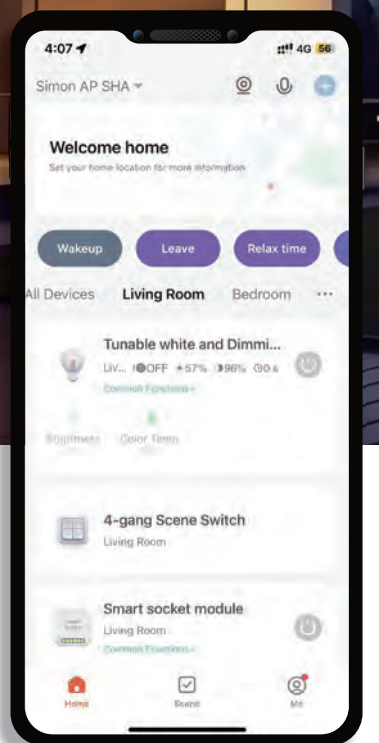

KNX to Simon smart bridge

KNX to Simon Smart Bridge Delivers enhanced smart home convenience with full app control. It enables the Simon Smart App to manage KNX lighting, temperature, shading, and all KNX home components via integration with the Simon Smart Cloud Server. The app unifies control of Simon Smart Zigbee/Wi-Fi devices and KNX devices in a single interface, and supports voice control via Alexa, Google Assistant, Yandex, and Siri. When paired with the Simon Smart Home Gateway, KNX functionality expands to leverage the full Simon Smart Home ecosystem. Zigbee 3.0 technology enables cost-effective, wireless integration of smart switches, control panels, smart intercoms, smart locks, smart RGBW lighting, and other wireless devices.

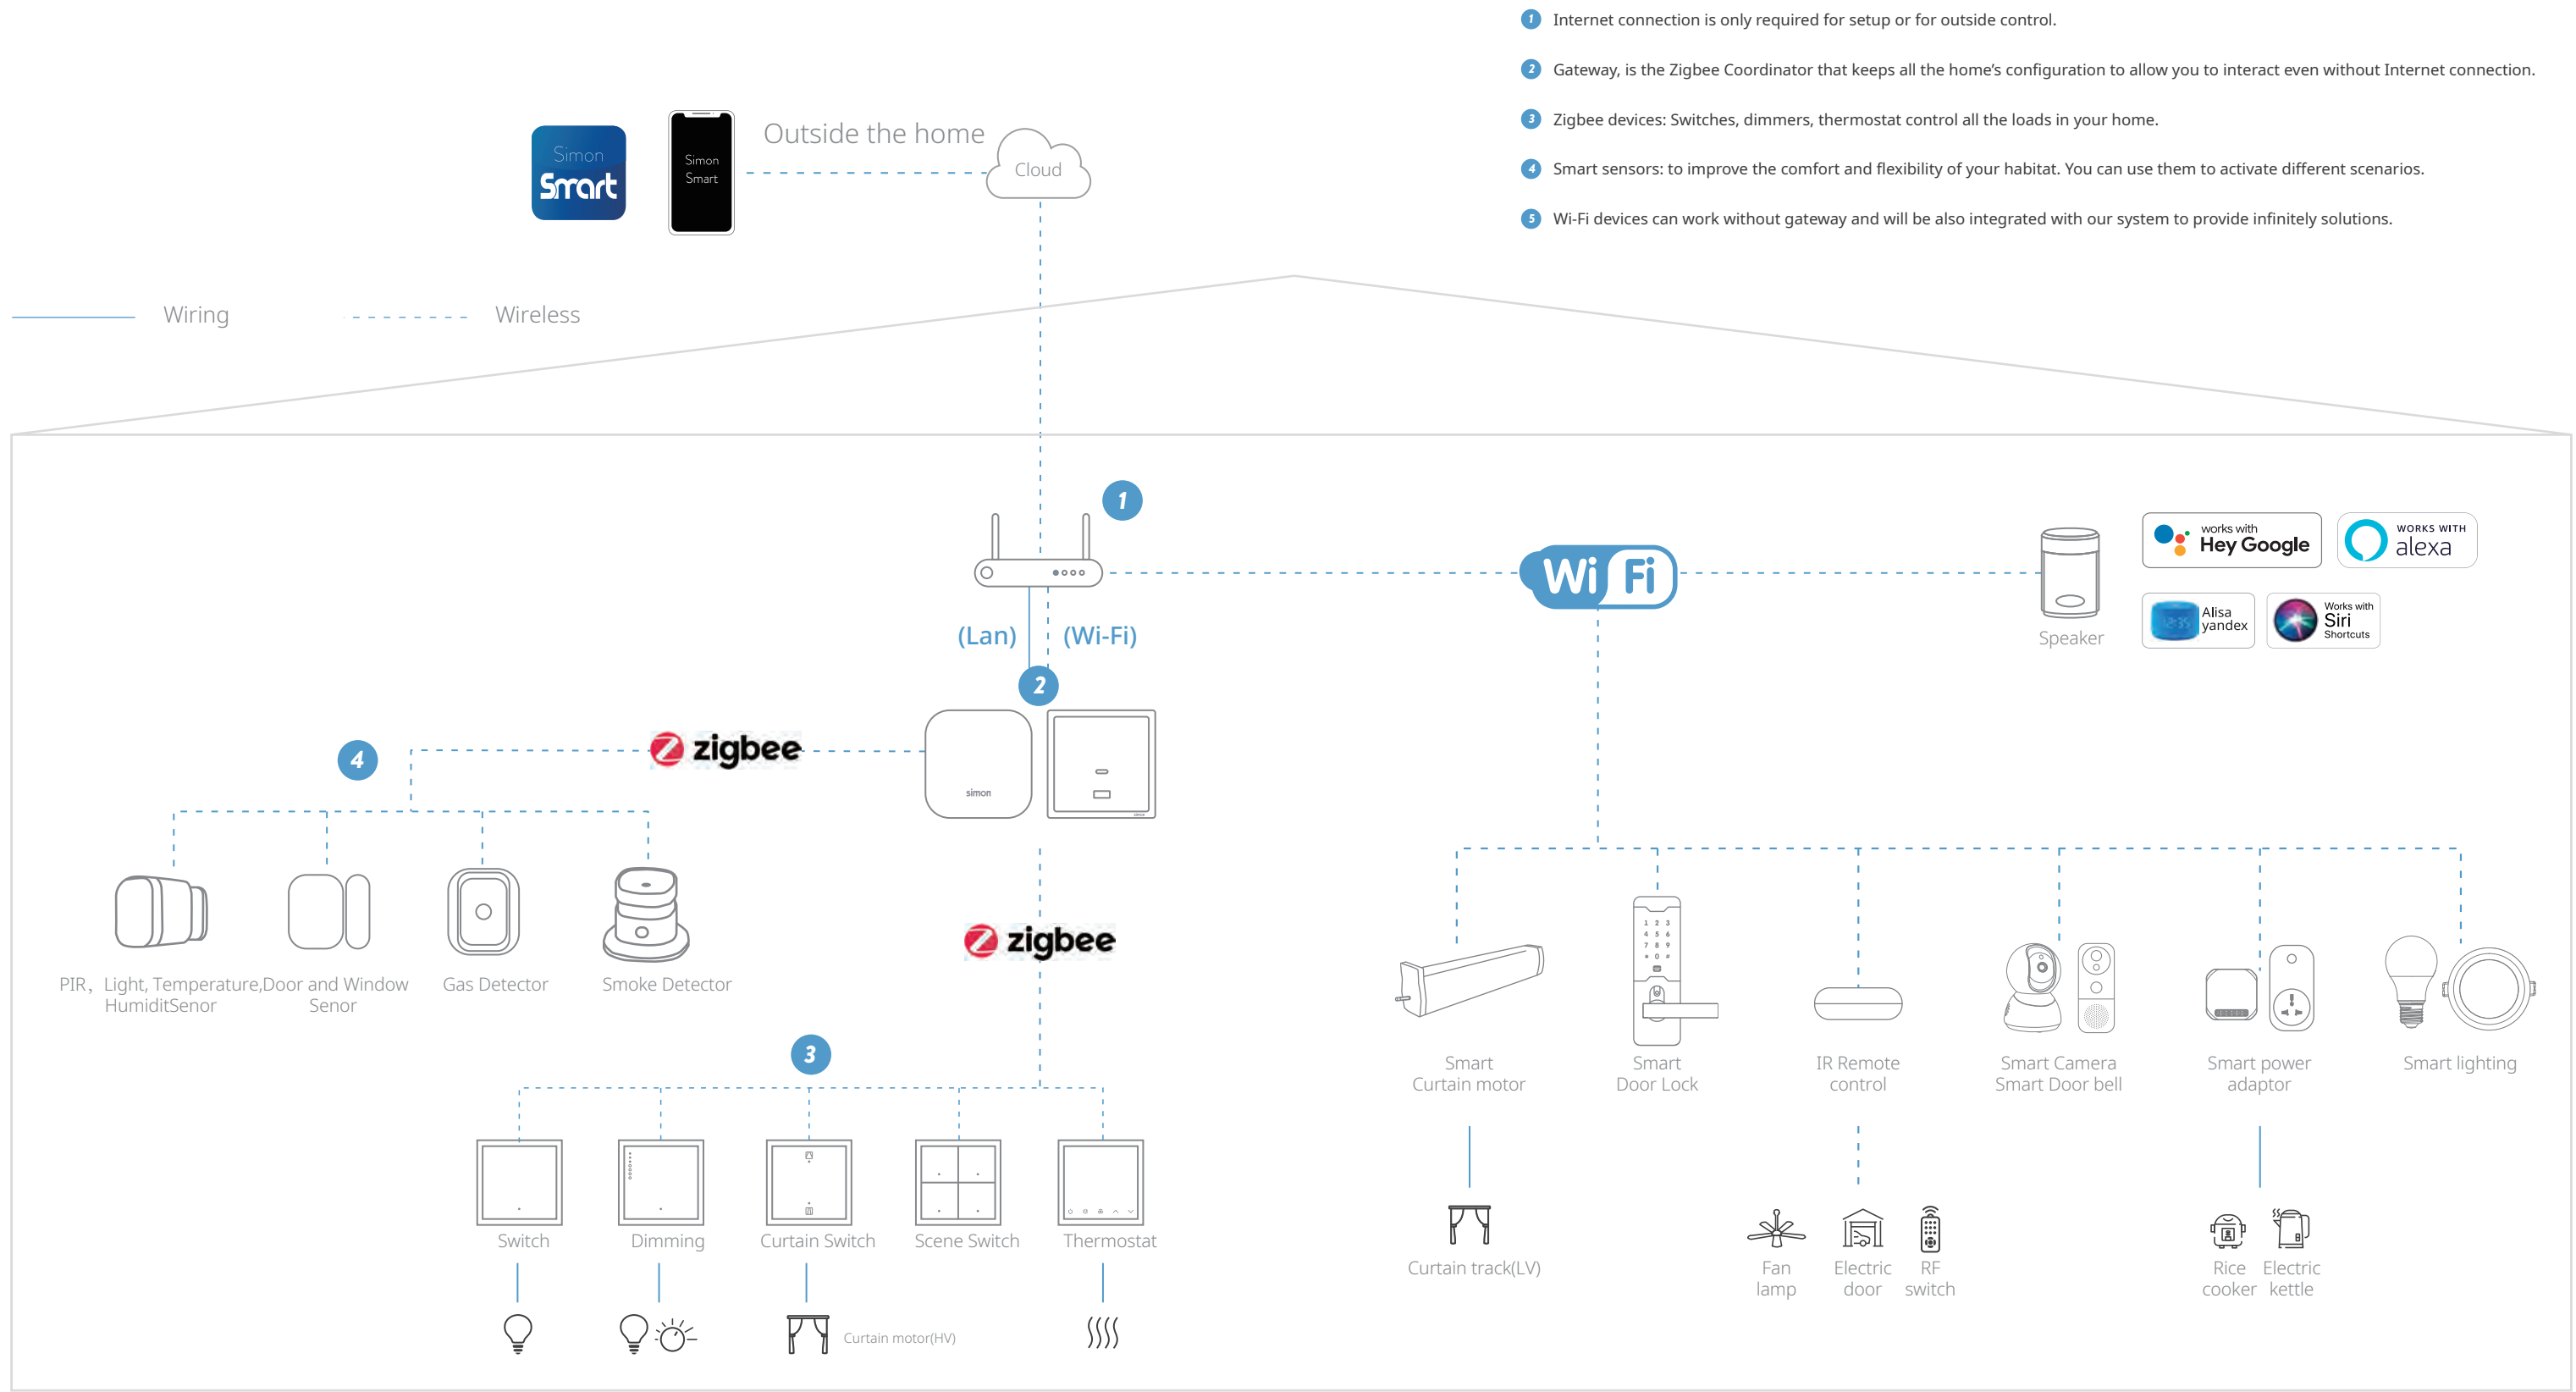

Smart control of the home devices

- Central Control
- Energy Management
- Lighting
- HVAC
- Curtain, Motorized Shades
- Background music
- Security
- Smart Accessories & Expandable Ecosystem

Expand Wireless Whole Home Smart Devices

Build a Comprehensive Ecosystem for Smart Homes

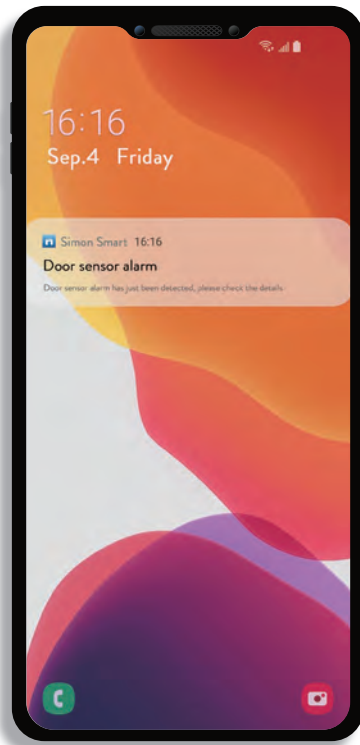

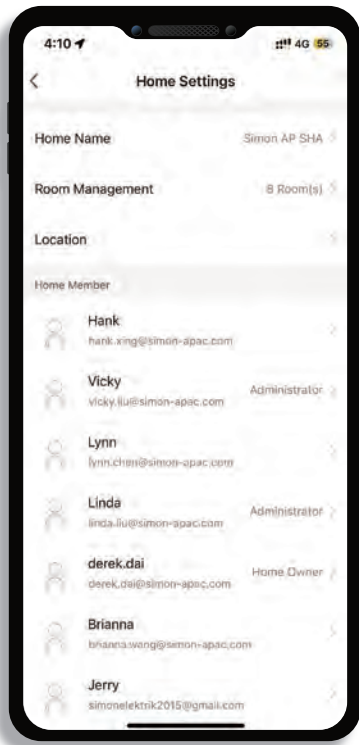

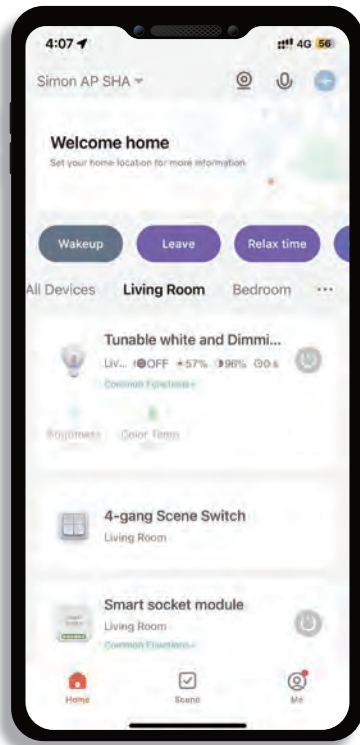

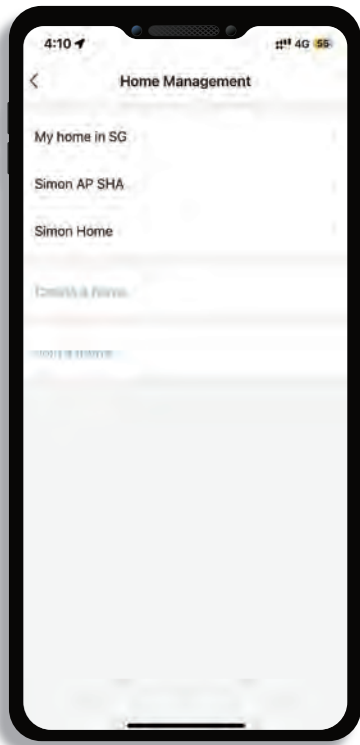

Everything at your fingertips

reddot award 2020
